MK-III 3 DIVER SURFACE STATION

The MK-III Three-Diver surface station is designed to support military diving profiles. It allows two divers and a standby diver to communicate via hardwire communications in addition to the surface tender. An auxiliary connector for use with HeO2 (Helium) de-scramblers is also included.

PROUDLY MADE IN USA

MODULAR CONNECTOR PANEL

A modular connector panel makes swapping topside connectors for different CommRope connectors a breeze. Options include: MS, AMP, and Banana connectors.

CONNECT TWO BOXES TOGETHER

The ability to connect two boxes together gives even greater versatility to the MK-III 3 Diver Box by allowing up to 6 divers to talk simultaneously with a surface tender.

POWERFUL SPEAKER

The MK-III 3 Diver Box puts out incredible sound delivered by a powerful panel speaker, perfect for noisy environments where extreme volume is needed.

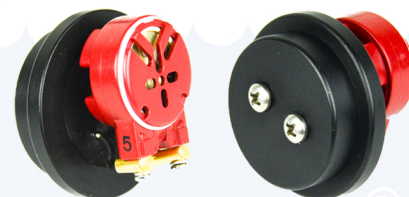

EP-45MM EARPHONE/MICROPHONE ASSEMBLY

The EP-45MM is our latest product added to the ANU made for use with the Interspiro AGA (MK-20) full face mask. We have removed all of the most common failure points to produce the most robust and resilient Earphone/Microphone assembly. Features include: Powered Mic with 90 degree elbow, potted joints to prevent bends and a heavy duty braided sleeve.

MARSH MARINE & HI-USE EARPHONE / MICROPHONE ASSEMBLIES

OTS offers various Earphone / Microphone Assemblies for many Full Face Masks and Hard Hats brands with Marsh Marine or Hi-Use connectors suited to plug directly into a communication rope or umbilical.

ME16-SL EARPHONE/MICROPHONE ASSEMBLY

The ME16-SL allows for the use of the OTS ME-16R Hot Mic (150 Ohm dynamic) in Kirby Morgan SuperLite helmets. The patented Hot Mic® evolved from many years of research and development to design a true noise-canceling microphone to withstand tough commercial diving conditions.

PDR-100 PORTABLE DIVER RECALL

The PDR-100 was designed with Military, Public Safety and Commercial applications in mind. Designed with a rugged housing and durable underwater speaker, this Portable Diver Recall system can emit a siren tone and is made for a long working life under harsh environments. The PDR-100 includes everything needed to get started: The PDR-100 Unit, Underwater Speaker, Battery & Charger

MK2-DCI HARDWIRE SURFACE STATION

The Aquacom MK2-DCI is a compact, self-contained two diver hardwire surface station that provides clear, reliable and highly intelligible communications. Built for demanding conditions, the MK2-DCI is the preferred surface station used by Public Safety Teams and Commercial outfits around the world.

FLOATING COMMUNICATION CABLE

This buoyant cable helps minimize entanglements hazards by keeping the bulk of the cable on the surface. The floating cable also reduces the amount of "drag" felt by the diver below and can be used as a safety line with a breaking strength of 2,592 lbs. Available in two colors: blue and yellow.
